

Appendix C: Environmental Constraints Memo

Prepared for the City of Littleton | February 2024

Environmental Constraints Memorandum

Date: August 11, 2023
To: Josh Mehlem, Consor Engineers
From: Megan Paliwoda, Pinyon Environmental, Inc.
Subject: Littleton Downtown Mobility Study

I. Environmental Constraints Introduction

The City of Littleton (City) is planning to advance a streetscape improvement plan along the Downtown Core and surrounding suburban areas that foster connectivity, captures innovation, and enhances operational efficiency. The City is encountering notably increased traffic volumes and congestion as the surrounding areas continue to grow, with direct impacts seen to the Downtown Littleton area. The City looks to advance mobility in the Downtown Core while prioritizing historic preservation and community engagement.

Pinyon Environmental, Inc. (Pinyon), has been sub-contracted to identify critical environmental resources in the study area (identified in **Figure 1**) that should be considered in the location and design of the planned improvements. Pinyon's constraints analysis provides a high-level understanding of existing environmental conditions for environmental resources including hazardous materials, cultural, biological, and non-historic Section 4(f) and Section 6(f) of the Department of Transportation Act. This analysis consists of desktop surveys, aerial reviews, and state and federal database searches to identify environmental resource considerations in the study area. The constraints analysis aims to be broad enough to encompass the variety of potential alternatives that the design team may end up developing for the Littleton Downtown Core, within the study area.

The findings and considerations discussed in this memorandum are generally written under the assumption that one or more recommended projects resulting from this study may pursue federal funding and that such federal funding is likely to be regulated through either the Colorado Department of Transportation (CDOT) or the Federal Highway Administration (FHWA).

2. Project Location

This project is located in the City of Littleton, Arapahoe County, Colorado. The approximate geographical location of the project is centered at decimal degree coordinates (World Geodetic System of 1984 [WGS84]) latitude 39.614°, longitude -105.017°. The project is located in Section 17, Township 5 South, Range 68 West, of the 6th Principal Meridian on the U.S. Geological Survey (USGS) Littleton, Colorado 7.5-Minute Quadrangle (USGS, 2023). The study area is bounded by U.S. 85 (South Santa Fe Drive) to the west, and the D-line light rail line to the east. The upper boundary of the study area is State Highway 88 (West Belleview Ave), and the southern boundary is near the intersection of the D-line and U.S. 85. The study area is depicted in **Figure 1**.

Figure I. Study Limits

3. Environmental Constraints Analysis Methodology

Pinyon evaluated the study area to assess the environmental conditions using readily available Geographic Information Systems (GIS) data, Google Earth, and desktop reviews. This Environmental Constraints Analysis covers a variety of environmental resource areas, including hazardous materials, cultural, biological, and non-historic Section 4(f) and 6(f) of the Department of Transportation Act. The following sections provide details on these resources.

4. Hazardous Materials

4.1 Introduction

4.1.1 Regulatory Context

There are multiple federal, state, and local environmental regulations that provide for the use, transport, and disposal of hazardous materials as well as for clean-up of soil and groundwater that have been impacted by improper use, storage, and disposal. The following sections detail common regulations that pertain to hazardous materials.

4.1.1.1 Federal Regulations

- *Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)* (42 United States Code [USC] Part 103, Section 9601 et seq.). The CERCLA was enacted in 1980 (42 USC §9601 et seq.) and subsequently amended by the Superfund Amendments and Reauthorization Act (42 USC §9601 et seq.). CERCLA (also known as “Superfund”) is designed to clean up closed and abandoned sites contaminated with hazardous substances. The law authorizes the U.S. Environmental Protection Agency (EPA) to identify parties responsible for contamination of sites and compel the parties to clean up the sites. Sites potentially impacted by hazardous substances are reported to EPA and additional investigation is conducted. Based on the results of the investigation, EPA either determines that no further action is necessary at the federal level (but may refer the site to the state for additional activities) or places the site on the National Priorities List. Sites remain on the list until clean-up activities have been completed and the site is delisted.
- *EPA Standards and Practices for All Appropriate Inquiries/ American Society for Testing and Material International (ASTM)* (40 Code of Federal Regulations [CFR] Part 312). EPA has established federal standards and practices for conducting all appropriate inquiries related to the previous ownership and uses of a property to qualify for landowner liability protections under CERCLA.
- *National Emission Standards for Hazardous Air Pollutants (NESHAP)* (40 CFR Part 61, Subpart M). The EPA air toxics regulation for asbestos is intended to minimize the release of asbestos fibers during activities involving asbestos handling. The air toxics provision of the Clean Air Act requires EPA to develop and enforce regulations to protect the public from exposure to airborne contaminants. In accordance with Section 112 of the Clean Air Act, EPA establishes NESHAPs. The Asbestos NESHAP regulation provides a method for identifying asbestos-containing materials and defines a process to categorize, abate, transport, and dispose of these materials.
- *Occupational Safety and Health Administration (OSHA) Asbestos Standards* (General Industry 29 CFR 1910, Subpart Z; Construction 29 CFR 1926). OSHA has standards to protect workers from the hazards of asbestos depending on the type of workplace. The General Industry Standard covers exposures occurring from activities such as brake and clutch repair, maintenance work, and manufacture of asbestos-containing products. The Construction Standard covers construction, alteration, repair, maintenance, renovation, and demolition of structures containing asbestos.

- *OSHA Lead Standard for the Construction Industry (29 CFR 1929.62)*. OSHA has standards to protect workers from the hazards of lead in a variety of forms, including metallic lead, all inorganic lead compounds, and organic lead soaps. The standard establishes maximum limits of exposure to lead for all workers covered, including permissible exposure limits and action levels. This standard applies to construction where a worker may be exposed to lead due to alteration, repair, demolition, salvage, or other disturbance of materials covered with lead-containing paint.
- *Resource Conservation and Recovery Act (RCRA) (40 CFR Parts 260-299)*. RCRA (42 USC §321 et seq.), enacted in 1976, establishes a framework for the management of both solid waste and hazardous waste. RCRA Subtitle C authorizes EPA to develop regulations for cradle-to-grave management of these wastes. In Colorado, the Colorado Department of Public Health and Environment (CDPHE) has promulgated regulations for management of both solid waste (6 Code of Colorado Regulations [CCR] 1007-2) and hazardous waste (6 CCR 1007-3).
- *Toxicity Substances Control Act (40 CFR Parts 700-760, 762, 765-766)*. The Toxicity Substances Control Act provides guidance to EPA and authorized states with administering compliance of this act, particularly related to polychlorinated biphenyls (PCBs). PCBs were banned from manufacture in the U.S. in 1979, although some products and equipment may still contain these substances. Of particular concern are electric transformers, including those that are pole- or pad-mounted.

4.1.1.2 State and Local Regulations

- *Underground Storage Tank (UST) Remediation*, Colorado Department of Labor and Employment—Division of Oil and Public Safety (OPS) (7 CCR 1101-14). Under the auspices of the Colorado Department of Labor and Employment OPS, this remediation complies with laws and regulations surrounding damage to the environment and risk to the public from leaking storage tanks, identifies responsibilities of the owner/operators of storage tanks, and provides technical guidance for response to releases from storage tanks.
- *Radiation Control*, CDPHE, Hazardous Materials and Waste Management Division (6 CCR 1007-1), provides guidance on radiation management.
- *CDPHE Solid Waste Regulations (6 CCR 1007-2 Part 1, Section 5) and Air Quality Control Commission Regulation 8 (Part B)*. The CDPHE Solid and Hazardous Waste Commission Regulation Pertaining to Solid Waste Disposal Site and Facilities governs the disposal of asbestos waste and management of asbestos-contaminated soil in Colorado. The Air Quality Control Commission governs asbestos abatement in Colorado.

The U.S. Department of Transportation and the Colorado Department of Public Safety, State Patrol Hazardous Materials Section, are responsible for regulating hazardous materials in transportation. The Colorado State Patrol is responsible for reporting spills to the CDPHE associated with highway transportation incidents.

4.2 Methodology

4.2.1 Data Gathering

A review of the compliance history and regulatory database search of facilities as received from Environmental Risk Information Service (ERIS) within or adjacent to the study area, including potential hazardous material facilities up to one mile from the study area, was completed (see **Attachment A**). It is not possible to verify the accuracy or completeness of information contained in these databases; however, the use of and reliance on this information is a generally accepted practice in conducting environmental due diligence.

4.2.2 Analysis Approach

The primary concern focuses on potential impacts to soil and groundwater in the study area. This analysis did not include a detailed review of each facility identified in the agency database, such as whether a release was reported or confirmed, regulatory compliance, remediation, or regulatory closure. For this analysis, the number and types of regulated facilities were identified within the prescribed search distances (**Attachment A**) and used to evaluate the potential environmental risks posed by regulated facilities within the study area. Risk was defined as low, moderate, or high based on the type of facility, the hydrogeologic relationship of the facility to the study area, and distance to the study area. Risk was defined as follows:

- **A low-risk facility** was determined to be unlikely to result in contamination during construction due to variables such as distance of a facility from the study area, minimal work anticipated near the facility, or hydrogeological position of the facility (for example, a release from the facility would travel away from the study area).
- **A moderate-risk facility** was determined to be unclear if contamination would be present, but the potential could not be discounted.
- **A high-risk facility** was determined to be a location where known contamination would likely be encountered during construction.

The information on hazardous materials sites in the study area can help inform design modifications or additional analysis that may be warranted as alternatives are evaluated and screened.

4.3 Findings

4.3.1 ERIS Database Findings

Table 1 below lists the facilities that were identified by ERIS within the study area and includes the risk potential along with the reasoning behind the facility’s inclusion and respective risk. These facilities are also labeled by ERIS ID in **Figure 2**.

Table 1. Recognized Environmental Conditions by Potential within the Study Area.

ERIS ID	Facility Name	Facility Address	Potential	Reasoning
2	Littleton Cleaners	5673 S Prince St	Moderate	Dry cleaner with no reported releases
7	RTD Park and Ride	5700 S Prince St	Moderate	LST with one release – pre-RBCA closure
20	City of Center	Town Hall Center 81125	Low	Two USTs with no reported releases, both reported permanently closed
24	Chamber of Commerce LF	N of W Main St & E of Santa Fe Dr	High	Historical landfill. Methane identified during 4/12/1978 methane survey.
33	Merles Alignment Services	2609 W Main St	Low	LST with one release – Tier I closure
35	Fountainhead – Reg 7 Reporting	No listed address	Low	Natural gas extraction facility, no reported releases or violations
41	Elliott Cleaners	2545 W Alamo Ave	Moderate	Dry cleaner with no reported releases
42	Bradford Auto Body Inc	2659 W Main St	Low	Active HAZ GEN small quantity generator

ERIS ID	Facility Name	Facility Address	Potential	Reasoning
43	City of Littleton	2626 Main St	Low	One UST with no reported releases, reported permanently closed
49	Valley Feeds – Gary Sutton/Valley Feed and Supply	2679 West Main Street	Moderate	LST with one release – pre-RBCA closure
53, 59	Littleton Schools I, II, III	5833 S Prince St	Moderate	VCP property – impacted soil and groundwater remain at discrete/infeasible to remove areas. CDPHE NAD obtained
55	Acres Property Management LLC	2690 W Main St	Low	LST with one release – Tier I closure
61	Municipal Court Building	2255 W Berry Ave	Low	LST with one release – administrative closure (no release)
65	Columbine Ambulance Center	5393 S Prince St	Moderate	LST with one release – pre-RBCA closure
69	Littleton GS Property LLC	5890 S Santa Fe Dr	High	LST with four releases – closures ranging from Tier I to Tier III
70	Arapahoe County Admin Bldg	5334 S Prince St	Moderate	LST with one release - pre-RBCA closure
77	Daniels of Denver Automotive	5240 S Santa Fe Dr	Low	Five USTs with no reported releases, reported permanently closed
80	The Electron Corp./Littleton Electron I & II	5101 S Rio Grande	Moderate	LST with one release – pre-RBCA closure; VCP Property – impacted soil removed from property
84	Santa Fe 66/Phillips Petroleum Co SS#27614	6200 S Santa Fe Dr	High	LST with six releases – closure ranging from administrative to Tier I. One active release - implementing CAP
94	Jazz Car Wash & Detailing	6095 S Santa Fe Dr	Moderate	LST with one release – pre-RBCA closure
95	Centennial U Haul Center	5090 S Santa Fe Dr	Moderate	LST with one release – pre-RBCA closure

AUL – Activity Use Limitations
 CAP – Corrective Action Plan
 CDPHE – Colorado Department of Public Health & Environment
 CERCLIS – Comprehensive Environmental Response, Compensation and Liability Information System
 GW – Groundwater
 HAZ CORRACT – Hazardous Waste Sites Corrective Action
 HAZ GEN – Hazardous Materials Generator
 LST – Leaking Storage Tanks
 NFRAP – No Further Remedial Action Planned
 RBCA – Risk-based Closure Assessment
 RCRA – Resource Conservation and Recovery Act
 CORRACTS – RCRA Corrective Action facility
 TSD – RCRA Treatment, Storage, and/or Disposal facility
 SEMSARCH – EPA Superfund Enterprise Management System Archive site
 UST – Underground Storage Tank
 VCP – Voluntary Cleanup and Redevelopment Program

Figure 2. Facilities of Potential Concern within the Study Area.

4.4 Recommendations and Considerations

4.4.1 Design-phase Recommendations

If future improvements will impact facilities of potential concern, detailed evaluation of specific facilities is recommended, including reviewing facility files, and evaluating potential construction and/or property ownership concerns.

The potential for the hazardous materials identified in this constraints analysis to impact future project activities is dependent on construction types, magnitude, and construction depth. For instance, resurfacing activities near a gas station where depth of disturbance during construction would be less than a few feet are unlikely to result in exposure to regulated materials. However, deep construction such as installation of caissons near a gas station could result in exposure to regulated materials.

4.4.2 NEPA Considerations

If FHWA/CDOT oversight is required for the project, CDOT Form 881/Initial Site Assessment or Modified Environmental Site Assessment and potentially a Phase I Environmental Site Assessment (ESA) would be required. A current agency database along with review of specific project actions would also be required. If facilities of concern are identified adjacent to the projects, and depths of construction may impact these facilities, additional investigation, including soil and/or groundwater sampling, may be prudent. Results of additional investigation can then inform mitigation measures. Regardless of CDOT involvement, it is prudent to complete a Phase I ESA if any right-of-way will be acquired.

5. Cultural Resources

5.1 Introduction

5.1.1 Regulatory Context

Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended, and 36 CFR 800 requires Federal agencies to consider the effects of their actions on historic properties. Under Section 106, a federal sponsor must define the Area of Potential Effects (APE) and determine if there are any historic properties located within the APE, and then assess if the undertaking will result in an adverse effect to any historic properties. If there is an adverse effect on historic properties, the project must avoid, minimize, or mitigate those effects.

5.2 Methodology

Pinyon designated a cultural study area for the proposed undertaking consisting primarily of the Downtown Littleton area between West Berry Avenue and West Church Avenue. Pinyon historians conducted a desktop analysis to assess the cultural study area for historic and potentially historic resources. To account for a yet-to-be-determined construction horizon, resources that are 45 years of age or older (constructed on/before 1978) were considered in this evaluation. Previously surveyed historic resources were identified through a file search of the Colorado Cultural Resources Online Resource (COMPASS) database maintained by the Office of Archaeology and Historic Preservation (OAHP). Potentially historic resources were identified through a records search of the Douglas County assessor records, the Online Transportation Information System (OTIS) maintained by CDOT, and the Historic Highway Inventory completed by CDOT in 2016. This data was supplemented with Government Land Office records, aerial images available on Google Earth, and current and historic topographic maps.

5.3 Cultural Resources File Search

The COMPASS file search requested through OAHP was conducted on July 19, 2023 (History Colorado, 2023). The search identified 208 previously evaluated resources within the study area (**Figure 3**). The file search revealed a National Register of Historic Places (NRHP)-listed historic district covering portions of Main Street and adjacent properties.

Figure 3. Previously Evaluated Historic Resources within the Study Area.

5.4 Cultural Resource Considerations

Once a recommended or preferred design alternative is identified, should the project have a federal nexus to Section 106 of the NHPA, or the Colorado State Register of Historic Places Act and the corresponding APE [Section 106] or Area of Proposed Action (APA) [Colorado Register of Historic Places Act] includes all, some, or part of these resources, consultation with the State Historic Preservation Office (SHPO) may be required. The scope of the historic evaluation should be determined in coordination with whichever sponsoring agency oversees the federal nexus.

- Resources with an official determination of eligible older than five years may require reevaluation (e.g., FHWA/CDOT projects in accordance with *Programmatic Agreement Among the Federal Highway Administration, the Advisory Council on Historic Preservation, and the Colorado Department of Transportation Regarding Compliance with Section 106 of the NHPA, As It Pertains to the Administration of the Federal-Highway-Aid Program in Colorado*).
- Newly identified potentially historic resources may require evaluation of eligibility and effects using the appropriate OAHP cultural resource inventory form. Historic Section 4(f) of the Department of Transportation Act would apply to those resources determined NRHP eligible and would require additional documentation from CDOT/FHWA, assuming an FHWA nexus. Any other federal nexus may still require such evaluation but may not be subject to Section 4(f) of the Department of Transportation Act.
- Resources with an official determination of not eligible are not likely to require reevaluation.

6. Biological Resources

6.1 Introduction

Pinyon conducted a desktop review to identify potential sensitive biological resources within the study area, including wildlife, vegetation, and habitat for threatened and endangered species. The purpose of this review is to address existing conditions regarding biological resources and protected species in accordance with the following federal and state regulations or policies:

- *U.S. Endangered Species Act (ESA)*: Protects federally listed plant and animal species with the goal of ensuring their long-term survival. The U.S. Fish and Wildlife Service (USFWS) administers these requirements.
- *Colorado Non-game, Endangered, and Threatened Species Conservation Act*: Protects state-listed and state special concern species with the goal of ensuring their long-term survival. Colorado Parks and Wildlife (CPW) administers these requirements.
- *Bald and Golden Eagle Protection Act (BGEPA)*: Protects Bald (*Haliaeetus leucocephalus*) and Golden (*Aquila chrysaetos*) Eagles. The USFWS administers these requirements.
- *Migratory Bird Treaty Act (MBTA)*: Protects birds, their active nests, and their eggs (except Rock Doves [*Columbia livia*], European Starlings [*Sturnus vulgaris*], and some other non-native birds). The USFWS administers these requirements.
- *Section 404 of the Clean Water Act (CWA)*: Regulates waters of the U.S. (WOTUS), which includes wetlands and non-wetland waters. Impacts to these features would require permitting through the U.S. Army Corps of Engineers (USACE).

- *Noxious Weeds*: The Colorado Department of Agriculture (CDA) Noxious Weed Act of 2003 (CRS 35-5-101; CRS 35-5.5-101; Executive Order [EO] D-006-99) defines and prioritizes management objectives for state-designated noxious weeds. The CDA classifies noxious weed species into three categories: List A, List B, and List C. List A species are designated by the Commissioner of the CDA for eradication. List B species are those species that are managed to stop continued spread. List C species are weed species that are not required to be managed by local jurisdictions but are monitored to provide additional education and research (CDA, 2020).

Additionally, because there is the potential for designs resulting from this study to utilize federal or CDOT funding, the desktop review also assessed the presence of any Colorado Senate Bill 40 (SB 40) resources within the study area.

6.2 Methodology

A desktop analysis to identify potential biological resources was conducted using aerial imagery, the USFWS Information for Planning and Consultation (IPaC) System, Colorado Natural Heritage Program (CNHP) Colorado Conservation Data Explorer (CODEX), the CPW Threatened and Endangered List, CPW Species Activity Mapping data, USFWS National Wetlands Inventory Mapper, U.S. Department of Agriculture (USDA) soil maps, USGS 7.5-Minute Topographic Maps, USGS National Hydrography Dataset, and other existing data sources (Google Earth Pro, 2023; USFWS, 2023a; CNHP, 2023; CPW, 2023a; CPW, 2023b; USFWS, 2023b; USDA, 2019; USGS, 2022; USGS, 2023).

6.3 Findings and Considerations

6.3.1 General Habitat and Vegetation

The study area is surrounded by residential and commercial development with high levels of human-related noise and light. Given the presence of the roadways and surrounding development, the natural vegetation, soils, and hydrology within and near the study area have been altered by filling, grading, and improvement activities in the past. There are multiple urban parks within the study area, characterized by large and open grassy areas and landscaped trees and shrubs. Geneva Park, located in the northern portion of the study area, contains two water sources, including Geneva Lake and Slaughterhouse Gulch. Little Creek flows through the southcentral portion of the study area. Figure 4 below displays biological resources identified within the study area.

Figure 4. Biological Resources within the Study Vicinity.

6.3.2 Federally Listed Species

Based on a review of the USFWS online IPaC System, there are federally listed threatened (FT), federally listed endangered (FE), and federal candidate (FC) species with the potential to occur in, or be impacted by, a project in this location (USFWS, 2023a).

The pallid sturgeon (*Scaphirhynchus albus*; FE) and Piping Plover (*Charadrius melodus*; FT) are included because they occur downstream of the study area and could be impacted by projects that result in water depletions to the South Platte River or its tributaries. To address the effects depletions may have on federally listed species that depend on the river for their survival, agencies and organizations in Colorado, including public water suppliers, participate in the South Platte Water Related Activities Program (SPWRAP). If water for this project is sourced from a public water source within the South Platte River basin, potential effects to downstream species would presumably be addressed through SPWRAP via the water provider; therefore, these two species are not discussed further. Additionally, the western prairie fringed orchid (*Platanthera praeclara*; FT), and Whooping Crane (*Grus americana*; FE) are included. These species have traditionally been included as downstream species like the pallid sturgeon and Piping Plover but are currently included as “wherever found.” As these species could occur downstream of the study area, they have been addressed under the SPWRAP and are not discussed further.

Pinyon evaluated the potential for the remaining species listed in the IPaC system to occur in the study area based on an assessment of habitat and species distributions (**Table 2**).

Table 2. Potential for Federally Listed Species to Occur in the Study Area.

Common Name	Species	Federal Status	Habitat	Potential for Occurrence in the Study Area ¹
Mammals				
Gray wolf	<i>Canis lupus</i>	FE	Lone, dispersing gray wolves may be present throughout the state of Colorado, but are only known to occur in northwest Colorado in areas of low human occupancy.	None. Suitable habitat does not occur within the study area. Further, the gray wolf only needs to be considered if the activity includes a predator management program.
Insects				
Monarch butterfly	<i>Danaus plexippus</i>	FC	A variety of habitats that feature their obligate larval host plant, milkweed (<i>Asclepias</i> spp.)	Low. Monarch butterflies have the potential to migrate through the study area.

Common Name	Species	Federal Status	Habitat	Potential for Occurrence in the Study Area ¹
Plants				
Ute ladies'-tresses orchid	<i>Spiranthes diluvialis</i>	FT	Sub-irrigated alluvial soils along streams; open meadows on floodplains including riparian areas. The species generally occurs at elevations below 6,500 feet.	None. Suitable habitat does not occur in the study area.

FT = federally listed as threatened; FE = federally listed as endangered; FC = candidate for federal listing

¹Based on a review of distribution maps from NatureServe Explorer online (NatureServe, 2023) and Colorado Parks and Wildlife Species Activity Mapping (CPW, 2023a).

Based on the lack of habitat present within the urban study area, the project would likely have **no effect** on FT or FE species. There is potential for the monarch butterfly to occur throughout the study area; however, there are no Section 7 requirements for candidate species. Therefore, no consultation is required regarding the monarch butterfly.

Environmental conditions may change over time, and it is recommended that an updated assessment of federally listed species be completed once the project advances and an alternative design is known. If the project results in a **no effect** determination to federally listed species, then no further coordination with the USFWS would be required. If the project results in a **may affect, not likely to adversely affect** determination to federally listed species, then coordination with the USFWS would be required.

6.3.3 State-listed and State Special Concern Species

CPW lists amphibians, birds, fish, mammals, reptiles, and mollusk species as endangered (SE), threatened (ST), or of special concern (SC) within the state of Colorado (CPW, 2023b). The majority of these species are not expected to occur in the study area because it is outside of their range or appropriate habitat is not present. Pinyon reviewed the CNHP CODEX to identify state-listed and special concern species with the potential to occur in the study area and these species are described below in **Table 3** (CNHP, 2023).

Table 3. Potential for State-Listed Species to Occur in the Study Area.

Common Name	Species	State Status	Habitat ¹	Potential for Occurrence in Study Area
Mammals				
Black-tailed Prairie Dog	<i>Cynomys ludovicianus</i>	SC	Shortgrass or mixed-grass prairie. Common in most of the counties of the eastern plains, especially those immediately along the Front Range.	None. No black-tailed prairie dog burrows were observed on desktop imagery.

Common Name	Species	State Status	Habitat ¹	Potential for Occurrence in Study Area
Birds				
Burrowing Owl	<i>Athene cunicularia</i>	ST	Burrows in open grasslands, especially prairie, plains, and savanna.	None. Suitable habitat (prairie dog burrows) was not observed on desktop imagery.
Reptile				
Common Garter Snake	<i>Thamnophis sirtalis</i>	SC	Marshes, ponds, and the edges of streams; generally restricted to aquatic, wetland, and riparian habitats along the floodplains of streams; seldom found away from water or at isolated ponds. Active in shallow water and on land adjacent to water.	Low. There is potentially suitable habitat for this species around Littles Creek, Geneva Lake, and Slaughterhouse Gulch.
Amphibians				
Northern Leopard Frog	<i>Lithobates pipiens</i>	SC	Within or near permanent water with rooted aquatic vegetation. Commonly inhabit wet meadows and fields during the summer.	Low. There is potentially suitable habitat for this species around Littles Creek, Geneva Lake, and Slaughterhouse Gulch.

ST = state listed as threatened, SE = state listed as endangered, SC = State Special Concern species (not a statutory category).

¹Based on a review of distribution maps from Colorado Natural Heritage Program (CNHP, 2023)

Black-tailed Prairie Dogs and Burrowing Owls

No black-tailed prairie dog burrows were observed on aerial imagery. However, because there are open, grassy areas which may provide suitable habitat for prairie dogs and burrowing owls within the study area, it is recommended a field survey be conducted once the project advances and an alternative design is known.

Common Garter Snake and Northern Leopard Frog

The northern leopard frog and common garter snake have a low potential for occurrence along the surface water features within the study area, including Littles Creek, Geneva Lake, and Slaughterhouse Gulch. However, the potential for occurrence is unlikely since both species require a broader range of habitats. Therefore, the project would likely have no impacts on the SC northern leopard frog and common garter snake. However, it is recommended that an updated assessment of northern leopard frog and common garter snake habitat be completed once the project advances and an alternative is identified and design is known.

6.3.4 Migratory Birds

There were many large trees both directly in and within a 0.5-mile radius of the study area (within the CPW-recommended buffer zones for raptors) that could be used by nesting raptors (CPW, 2020). Additionally, the study area is located approximately 0.1 mile away from a CPW-mapped Bald Eagle summer forage area (**Figure 4**; CPW, 2023a).

Within the study area, small- to medium-sized trees, shrubs, saplings, tall grasses, and human-made structures could be used as nest sites for other (non-raptor) birds. In addition to several roadway overpasses, there are box culvert structures where Slaughterhouse Gulch and Littles Creek cross the tracks on the east side of the study area. These structures provide suitable nesting habitat for migratory birds such as cliff swallows (*Petrochelidon pyrrhonota*) and barn swallows (*Hirundo rustica*).

The nesting season for most birds generally occurs from April through August, although raptors may nest as early as December. Once the project advances and a design is known, the study area and 0.5-mile buffer around it should be surveyed for potential nesting birds. If construction activities occur during the nesting season, it is recommended that the project complete pre-construction surveys similar to those outlined in CDOT's Revision of Section 240—*Protection of Migratory Birds*. If active raptor nests are confirmed within a 0.5-mile buffer of the study area prior to the onset of construction, it is recommended that a qualified wildlife biologist consult with CPW to determine an appropriate survey protocol to ensure that project activities do not disrupt nesting activities within CPW-recommended raptor buffers (CPW, 2020).

6.3.5 Senate Bill 40

Colorado SB 40 (33-5-101-107, CRS 1973 as amended) requires any agency of the state to obtain wildlife certification from the CPW when the agency plans construction in "...any stream or its bank or tributaries..." Although SB 40 emphasizes the protection of fishing waters, it acknowledges the need to protect and preserve all fish and wildlife resources associated with streams in Colorado. If the funding source utilized for the final design triggers SB 40 adherence, and a surface water feature in the study area is determined during field survey to meet the criteria outlined in SB 40, a certification will be required.

6.3.6 Waters of the U.S.

Three surface water features, including Littles Creek, Slaughterhouse Gulch, and Geneva Lake, were noted within the study area. Pinyon recommends the project avoids impacts to these features, if practicable. If it is not feasible to avoid impacts to these features, Section 404 permitting may be required should these features be identified as WOTUS under the jurisdiction of the USACE. To determine whether these features are WOTUS and require Section 404 permitting, the project would require a formal wetland delineation and can submit an Approved Jurisdictional Determination (JD) request to the USACE. Only the USACE has the authority to make JDs. No further Section 404 permitting would be required for any features determined by the USACE to be non-jurisdictional. It can be challenging to predict the timeline and outcome of USACE JDs, and at this time the USACE has put all JDs on hold while the new WOTUS definition is being evaluated. Alternatively, the project could assume that the impacted waters are jurisdictional and apply for a Section 404 permit. Given the anticipated limited disturbance, it is likely the project would be covered under a Nationwide Permit (NWP), which typically has a shorter turn-around time than obtaining a JD (the USACE has 45 days to respond to the application, although they can reset the clock if additional follow-up or consultation is required). Section 404 permitting would also require compliance with the ESA and the NHPA.

6.3.7 Noxious Weeds

Given that the study area is located within a developed urban environment, it is likely that noxious weed species are present. Pinyon recommends that the project follow best management practices as outlined in CDOT's Revision of CDOT 217 – *Herbicide Treatment*. Pinyon recommends that these project specials and/or general notes be included in the contract/project plans.

7. Non-Historic Section 4(f) & 6(f) Resources

7.1 Introduction

Section 4(f) refers to the original section within the U.S. Department of Transportation Act of 1966 which provided for consideration of public park and recreation lands, wildlife and waterfowl refuges, and public or private historic sites during transportation project development. The law, now codified in 49 U.S.C. §303 and 23 U.S.C. §138, applies only to the U.S. Department of Transportation and is implemented by the FHWA and the Federal Transit Administration through the regulation 23 CFR 774. Should projects resulting from this study seek federal funds through FHWA, evaluation of Section 4(f) resources would apply. Section 4(f) includes historic and non-historic (recreational) properties alike; however, this section specifically evaluates non-historic (recreational) Section 4(f) resources.

Section 6(f) refers to a section of the Land and Water Conservation Fund (LWCF) Act of 1965 (Public Law 88-578, 78 Stat 897). The law prohibits the conversion of property acquired or developed with grants from the LWCF to a non-recreational purpose without the approval of the National Park Service (NPS). Section 6(f) typically applies to all transportation projects, regardless of the source of funding, and is approached as an entirely separate evaluation process from Section 4(f).

7.2 Methodology

To gather information on potential recreational Section 4(f) resources within the project study area, the project team reviewed the Colorado Trail Explorer (COTREX, 2023), along with park and trail maps from the City, to identify and map current recreational trails, parks, and open spaces.

Information on Section 6(f) resources was gathered using CDOT's OTIS, which is an ArcGIS Online mapping tool that contains up-to-date layers for parcels funded by LWCF.

7.3 Findings and Considerations

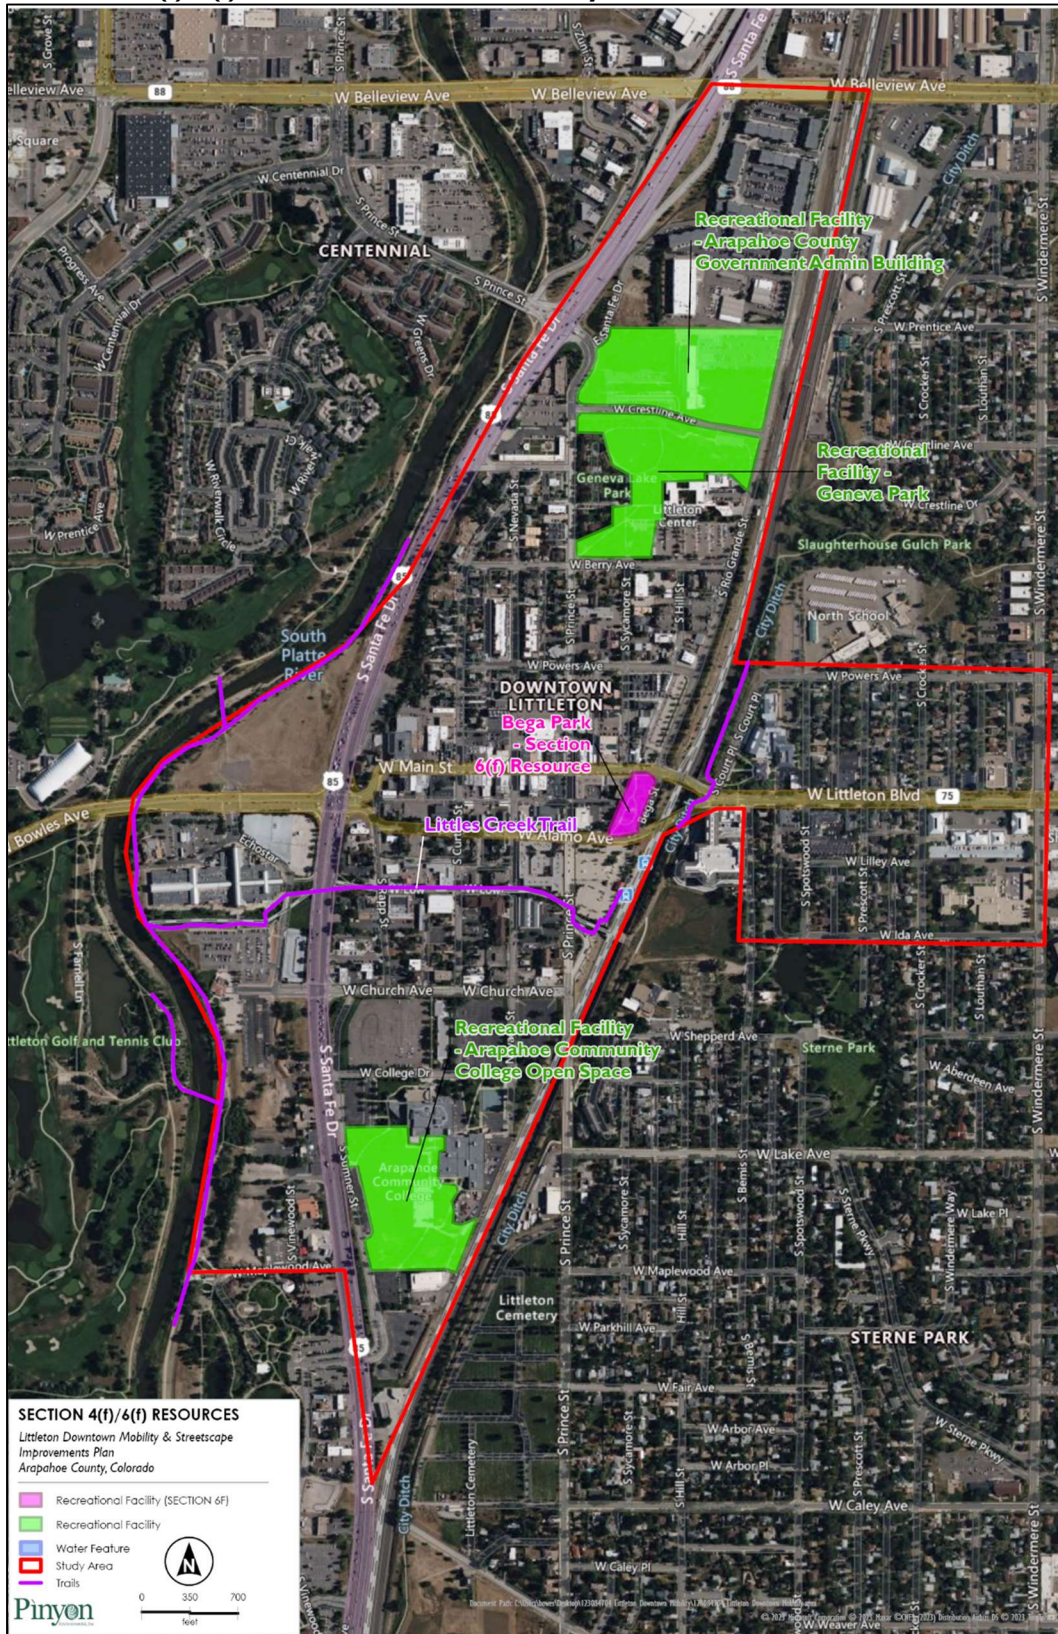

7.3.1 Non-historic Section 4(f) Resource Findings

There are recreational Section 4(f) resources located within the study area. Impacts to recreational Section 4(f) resources would trigger additional analysis. These resources are identified in **Figure 5** and are listed below.

- *Geneva Park*. Geneva Park is located in the northern portion of the study area. This Section 4(f) resource is a 10-acre park and includes Geneva Lake and Slaughterhouse Gulch.
- *Littles Creek Trail*. This Section 4(f) resource runs along Little's Creek through the project study area north of Church Avenue and south of Alamo Avenue.
- *Arapahoe Community College Open Space*. This resource is located in the southern portion of the study area and is a large grassy, unfenced area associated with Arapahoe Community College.

- *Arapahoe County Government Administrative Building.* The Arapahoe County Littleton Motor Vehicle Building is located directly north of Geneva Park and has two unfenced fields associated with it.

Figure 5. Section 4(f)/6(f) Resources within the Study Area.

7.3.2 Section 4(f) NEPA Considerations

According to FHWA guidance and the CDOT NEPA Manual, a Section 4(f) evaluation is required when a project uses a Section 4(f) resource. A use is defined as one of the following:

- Permanent incorporation/permanent easement – Land from a Section 4(f) property is permanently incorporated into the transportation system through fee simple acquisition or permanent easement.
- Temporary use of land for construction purposes is adverse in terms of the statute's preservation purpose.
- Constructive Use – Proximity impacts of the transportation project are so great that the purposes for which the Section 4(f) property exists are substantially impaired (normally referred to by courts as a constructive use).

The Section 4(f) evaluation should be initiated when alternatives for the proposed action are first being designed and developed. If the Section 4(f) evaluation is part of the NEPA document, it should be completed in conjunction with the NEPA process to the extent possible.

Compliance with Section 4(f) can be established in the following ways:

- Application of an exception to Section 4(f) identified in 23 CFR 774.13.
- *De minimis* impact determination.
- Nationwide Section 4(f) Programmatic Evaluation approved at the FHWA Division Office level.
- A full Section 4(f) evaluation requiring FHWA legal and external agency review prior to approval.

Note that each Section 4(f) impact applicable to the project alternative must meet compliance separately.

7.3.2.1 Exceptions to Section 4(f)

Exceptions to Section 4(f), as established by 23 CFR 774.13, allow the use of Section 4(f) properties without requiring a formal evaluation. Each exception has specific criteria that must be met in order to demonstrate applicability.

7.3.2.2 *De minimis* Impacts to Section 4(f)

Certain impacts to Section 4(f) properties may be considered minor (*de minimis*) in nature. Determination of *de minimis* impacts must also be demonstrated to and approved by the FHWA Colorado Division. Requirements for *de minimis* are included in 23 CFR 774.5(b), 774.7(b), and 774.17.

7.3.2.3 Programmatic Evaluations of Section 4(f)

FHWA developed five nationwide programmatic evaluations for Section 4(f) properties that include specific criteria to meet. Programmatic evaluations require coordination and documentation that include proof that there are no prudent and feasible alternatives to using the Section 4(f) resource and that all measures to minimize harm have been taken into account. Programmatic evaluations do not require legal review, only review and approval from the FHWA Colorado Division.

7.3.2.4 Individual Section 4(f) Evaluation

Individual evaluations require full and sufficient analysis and supporting documentation to demonstrate that there is no feasible and prudent avoidance alternative and that the preferred alternative causes the least overall harm. This analysis shall summarize the results of all possible planning to minimize harm. Evaluations typically adhere to draft and final stages and are subject to FHWA legal sufficiency review prior to approval.

7.3.3 Section 6(f) Resource Findings

Within the study area, Bega Park was identified as a Section 6(f) resource. This property is located on the eastern edge of the middle of the study area (**Figure 5**). If recommended projects were to take place adjacent to Bega Park, further analysis would be required, and avoidance of the park would be recommended.

7.3.4 Section 6(f) NEPA Considerations

Section 6(f) Evaluation generally follows the same initiation process as that of the Section 4(f) evaluation; however, once Section 6(f) impacts are identified and determined to be unavoidable, the project should coordinate with CPW to clarify property boundaries, propose mitigation that equitably counteracts impacts to the property, and achieve concurrence from CPW on the evaluation. Conversions of Section 6(f) property to anything other than recreational use require coordination with NPS and identification of replacement land of at least fair market value and equivalent usefulness. For more information, refer to the environmental guidance of the appropriate sponsor for the federal nexus.

8. Conclusions

Findings and recommendations made in this Environmental Constraints Analysis for each resource area aim to inform the development of design alternatives and to forecast the potential analyses that alternatives may require in accordance with the NEPA process; however, please note that this document itself does not satisfy analyses that may be required as part of the NEPA process. Refer to the *Considerations* sections of each individual environmental resource for information on potential NEPA analyses and evaluations that could be required.

It should also be noted that this Environmental Constraints Analysis does not cover the topic of environmental justice. As of the time this analysis was conducted, CDOT has expanded environmental justice requirements to cover Categorical Exclusion environmental documents, whereas their previous necessity was largely limited to Environmental Assessments and Environmental Impact Statements. If projects resulting from the design alternative recommendations of this study were to consider using federal funds, environmental justice would need to be analyzed much the same as the included resource areas in this document.

Notified Name:		WQCD: Michelle Thiebaud, David Kurz, Jorge Delgado, Christine Lukasik, Kelly Jacques, Anne Marie Goolsby; **Note: Many records provided by the department have a truncated [Notified Name] field.				
Additional Comments:						
Comments:		TRI-COUNTY EH: BRIAN HLAVACEK, MICHELE ASKANAZI, TOM BUTTS				
Cause Info:		Grease interceptor overflow backed up to grass and to a nearby gutter beside the street. There is grease in the gutter and on sidewalk, but the nearest storm drain is approx. 50 ft away. Businesses involved included Bruegger's Bagels and Panda Express.				
Action:		The line has been cleared now.

NRC Report No: 872213
Type of Incident: MOBILE
Incident Cause: OPERATOR ERROR
Incident Date: 5/27/2008 12:00:00 PM
Incident Location: PHILIP 66 RETAIL GAS STATION
Incident Dtg: OCCURRED
Distance from City: 0.5
Distance Units: MILES
Direction from City: SSW
Location County: ARAPAHOE
Potential Flag: No
Year: Year 2008 Reports
Description of Incident: RETAIL FUEL CUSTOMER LEFT DISPENSER NOZZLE UNATTENDED DURING TRUCK FUELING. OVERFILL OCCURRED, WITH APPROXIMATELY 15 GALLONS OF DIESEL SPILLING TO THE FACILITY PAVING. FACILITY SHUT-DOWN FLOW AND INITIATED SPILL RESPONSE, HOWEVER APPROXIMATELY 1 GALLON OF DIESEL ENTERED THE STORM DRAIN AT THE FACILITY. LOCAL FIRE JURISDICTION RESPONSE WAS INITIATED.

Additional Comments:						
Comments:		JEFFCO-JIM RADA, CRAIG SANDERS MINDI RAMIG, DAVE HOOKER				
Cause Info:		DURING OPERATIONS TO APPLY A REHAB LINER TO A SEWER LINE THE WASTEWATER AND CONSTRUCTION DEBRIS (DIRT/SAND) THAT WAS BEING VACUUMED UP DURING THE PROCESS WAS PLACED INTO A ROLL OFF DUMPSTER. THE DUMSPTER HAD A HOLE OR OPENING ON ITS BOTTOM THAT ALLOWED THIS MATERIAL TO BE RELEASED ON TO THE GROUND.				
Action:		ALL MATERIAL WAS RECOVERED USING A BACK HOE AND PLACED INTO ANOTHER ROLL OFF DUMPSTER FOR DISPOSAL. LIME WAS ALSO APPLIED TO IMPACTED AREAS FOR DISINFECTION PURPOSES.

Violation/Evaluation Summary

Note: NO RECORDS: As of Apr 2023, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

Handler Summary

Importer Activity: No
Mixed Waste Generator: No
Transporter Activity: No
Transfer Facility: No
Onsite Burner Exemption: No
Furnace Exemption: No
Underground Injection Activity: No
Commercial TSD: No
Used Oil Transporter: No
Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 20100106
Handler Name: TIGHT CURVES LTD
Federal Waste Generator Code: 3
Generator Code Description: Very Small Quantity Generator
Source Type: Notification

Waste Code Details

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING,

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Receive Date: 20180729
Handler Name: LOWES OF LITTLETON CO #2419
Federal Waste Generator Code: 2
Generator Code Description: Small Quantity Generator
Source Type: Notification

Waste Code Details

Hazardous Waste Code: D005
Waste Code Description: BARIUM

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: U154
Waste Code Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Hazardous Waste Code: D006
Waste Code Description: CADMIUM

Hazardous Waste Code: D018
Waste Code Description: BENZENE

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: D011
Waste Code Description: SILVER

Hazardous Waste Code: D009
Waste Code Description: MERCURY

Hazardous Waste Code: D016
Waste Code Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: D008
Waste Code Description: LEAD

Generator Code Description: Very Small Quantity Generator
Source Type: Notification

Waste Code Details

Hazardous Waste Code: D039
Waste Code Description: TETRACHLOROETHYLENE

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F002
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 19940516
Handler Name: THOMAS PLATING COMPANY INC
Federal Waste Generator Code: 2
Generator Code Description: Small Quantity Generator
Source Type: Notification

Waste Code Details

Hazardous Waste Code: F006
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Hazardous Waste Code: F019
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

[NPL](#)

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 23, 2023

National Priority List - Proposed:

[PROPOSED NPL](#)

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 23, 2023

Deleted NPL:

[DELETED NPL](#)

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 23, 2023

SEMS List 8R Active Site Inventory:

[SEMS](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jan 25, 2023

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jan 25, 2023

Inventory of Open Dumps, June 1985:

[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS:

[CERCLIS](#)

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Apr 24, 2023

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Apr 24, 2023

RCRA Generator List:

[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Small Quantity Generators List:

[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Apr 24, 2023

RCRA Very Small Quantity Generators List:

[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Apr 24, 2023

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Sites with Controls:

[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Apr 24, 2023

Federal Engineering Controls-ECs:

[FED ENG](#)

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Apr 26, 2023

Federal Institutional Controls- ICs:

[FED INST](#)

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Apr 26, 2023

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Mar 23, 2023

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Aug 8, 2022

Delisted Facility Response Plans:

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Aug 8, 2022

Historical Gas Stations:

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals:

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property:

[SEMS LIEN](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 25, 2023

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Mar 23, 2023

Formerly Utilized Sites Remedial Action Program:

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

Methane Gas Study Sites:

[LANDFILL METHANE](#)

This Investigation of Methane Gas Hazards report was prepared by the Denver Office of Emergency Preparedness in 1981. The purpose of this study was to assess the actual and potential generation, migration, explosive and related problems associated with specified landfills, and to identify existing and potential problems, suggested strategies to prevent, abate, and control such problems and recommend investigative and monitoring functions as may be deemed necessary. The Colorado Department of Health selected eight landfills as priorities due to population density and potential hazards to population and property.

Government Publication Date: Jan 2, 1981

Environmental Covenants and Use Restrictions:

[COVENANTS](#)

Boundaries of environmental covenant/environmental use restriction sites made available by the Colorado Department of Public Health & Environment (CDPHE). CDPHE has the authority to approve requests to restrict the future use of a property using an enforceable agreement called an environmental covenant. Land use restrictions may be used to ensure the cleanup remedy adequately protects human health and the environment when a contaminated site isn't cleaned up completely.

Government Publication Date: Apr 20, 2023

Superfund National Priorities List and Natural Resource Damages sites:

[SUPERFUND NRD](#)

Boundaries of Superfund National Priorities List sites and Natural Resource Damages sites in Colorado made available by the Colorado Department of Public Health and Environment (CDPHE).

Government Publication Date: Mar 29, 2023

Superfund Sites:

[SHWS](#)

A list of Superfund sites in Colorado made available by the Colorado Department of Public Health and Environment (CDPHE). In Colorado, the cleanup of Superfund sites is overseen by the CDPHE or the Environmental Protection Agency (EPA). This list includes active Superfund sites, deleted sites, proposed sites, and natural resource damage sites.

Government Publication Date: Jun 29, 2022

Delisted Superfund Sites:

[DELISTED SHWS](#)

Sites which once appeared on - but have since been removed from - the list of Superfund sites in Colorado made available by the Colorado Department of Public Health and Environment (CDPHE). In Colorado, the cleanup of Superfund sites is overseen by the CDPHE or the Environmental Protection Agency (EPA).

Government Publication Date: Jun 29, 2022

Solid Waste Facilities and Landfills:

[SWF/LF](#)

The Colorado Department of Public Health and Environment (CDPHE) regulates the management and disposal of solid waste and landfill facilities. This data is provided by the CDPHE's Hazardous Materials and Waste Management Division's Solid Waste Report and the Environmental Sites Search Map Application.

Government Publication Date: Nov 4, 2022

Historical Solid Waste (Closed or Abandoned Landfills):

[HIST LF](#)

In the early 1980s the Hazardous Materials Waste Management Division of the Colorado Department of Public Health and Environment (CDPHE) conducted a survey of staff members and local agencies. The information gathered was compiled in 1984 for sites that were known or thought to have waste issues. The information is not complete and generally not very definitive or verifiable. This data became the Solid Waste Historical Data. The data is not maintained and has not been since the late 1980s.

Government Publication Date: 1984

Tri-County Historic Landfills:

[HIST LANDFILLS](#)

A list of historical landfills made available by the Tri-County Health Department (TCHD). The TCHD serves Adams, Arapahoe, and Douglas Counties.

Government Publication Date: Jun 1, 2022

Registered Recycling Facilities:

[RECYCLING](#)

This list of registered recycling facilities in Colorado is maintained by the Colorado Department of Public Health & Environment (CDPHE). This list includes primarily processing facilities for recyclable materials, such as material recovery facilities, industrial recycling operations, and recyclable material end user sites. Collection centers/drop-off locations are not included unless the site is also processing recyclable materials (separating, sorting, dismantling, grinding, baling, etc.).

Government Publication Date: Mar 13, 2023

Leaking Storage Tanks:

[LST](#)

A list of leaking storage tank locations from the Colorado Storage Tank Information System (COSTIS) database, including those which have applied for reimbursement from the Petroleum Storage Tank Fund. This list is made available by the Division of Oil and Public Safety (OPS) of the Colorado Department of Labor and Employment (CDLE) and includes data compiled from applicable FOIA files, COSTIS files and other OPS datasets. Classified military tanks are excluded from this data.

Government Publication Date: Jun 1, 2023

LUST Trust Sites:

[LUST TRUST](#)

The Division of Oil and Public Safety of the Colorado Department of Labor and Employment (CDLE) manages a Petroleum Storage Tank Fund (The Fund) that receives and processes applications to the Fund for reimbursement of costs related to assessment and cleanup of petroleum contaminated sites. Classified military tanks are excluded from this data.

Government Publication Date: Jun 1, 2023

Delisted Leaking Storage Tanks:

[DELISTED LST](#)

This database contains a list of leaking storage tank sites and their Funds for reimbursement of costs related to assessment and cleanup that were removed from the Colorado Department of Labor and Employment (CDLE) database.

Government Publication Date: Jun 1, 2023

Underground Storage Tanks:

UST

A list of underground storage tanks from the Colorado Storage Tank Information System (COSTIS) database. This database is made available by the Division of Oil and Public Safety (OPS) of the Colorado Department of Labor and Employment (CDLE). Data is compiled from applicable FOIA files, COSTIS files and other OPS datasets. Classified military tanks are excluded from this data.

Government Publication Date: Jun 1, 2023

Aboveground Storage Tanks:

AST

A list of aboveground storage tanks from the Colorado Storage Tank Information System (COSTIS) database. This list is made available by the Division of Oil and Public Safety (OPS) of the Colorado Department of Labor and Employment (CDLE). Data is compiled from applicable FOIA files, COSTIS files and other OPS datasets. Classified military tanks are excluded from this data.

Government Publication Date: Jun 1, 2023

Storage Tank Information System (COSTIS):

TANKS

This storage tank listing is provided by the Colorado Department of Labor and Employment, Division of Oil and Public Safety (OPS). The OPS manages the Colorado Storage Tank Information System (COSTIS) database which stores information on these facilities. This tank data includes facilities with liquefied petroleum gas, liquefied natural gas, and compressed natural gas tanks which are not classified as either underground storage tanks or aboveground storage tanks. Data is compiled from applicable FOIA files, COSTIS files and other OPS datasets. Classified military tanks are excluded from this data.

Government Publication Date: Jun 1, 2023

Delisted Storage Tanks:

DTNK

This database contains a list of closed storage tank sites that were removed from the Division of Oil and Public Safety of the Colorado Department of Labor and Employment (CDLE) Tank Information System.

Government Publication Date: Jun 1, 2023

Environmental Covenants and Environmental Use Restrictions List:

AUL

The Colorado Department of Public Health and Environment (CDPHE) maintains a list of sites that have environmental covenants and use restrictions in place. Land use restrictions may be used to ensure the cleanup remedy adequately protects human health and the environment when a contaminated site is not cleaned up completely.

Government Publication Date: Apr 20, 2023

Voluntary Cleanup and Redevelopment Program Sites:

VCP

The Voluntary Cleanup and Redevelopment Program (VCUP) of the Colorado Department of Public Health and Environment (CDPHE) was created in 1994 with the objective to facilitate the redevelopment and transfer of contaminated properties. This VCUP site listing includes applicable active and inactive sites from the CDPHE Voluntary Cleanup Open Records data file and map layer.

Government Publication Date: Mar 20, 2023

Brownfield Sites:

BROWNFIELDS

A list of Brownfields Program sites from the Hazardous Materials and Waste Management Division and the Colorado Environmental Records Search Interactive Map made available by the Colorado Department of Public Health and Environment (CDPHE). Sites which go untouched because of their real or perceived contamination can be rehabilitated using the CDPHE Brownfields Program.

Government Publication Date: Apr 3, 2023

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands:

INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 8, which includes Colorado, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 20, 2023

Underground Storage Tanks on Tribal/Indian Lands:

INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 8, which includes Colorado, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 20, 2023

Delisted Tribal Leaking Storage Tanks:

[DELISTED INDIAN LST](#)

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

Delisted Tribal Underground Storage Tanks:

[DELISTED INDIAN UST](#)

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

County

No County databases were selected to be included in the search.

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program:

[TRIS](#)

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites:

[PFAS NPL](#)

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Mar 28, 2023

Federal Agency Locations with Known or Suspected PFAS Detections:

[PFAS FED SITES](#)

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from March 2022 to April 2023. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Apr 24, 2023

SSEHRI PFAS Contamination Sites:

[PFAS SSEHRI](#)

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map, credited to the Northeastern University's PFAS Project Lab, Silent Spring Institute, and the PFAS-REACH team. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: <https://pfasproject.com/pfas-sites-and-community-resources/>

Government Publication Date: Oct 9, 2022

National Response Center PFAS Spills:

[ERNS PFAS](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Limitations: The data from the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Apr 15, 2023

PFAS NPDES Discharge Monitoring:

[PFAS NPDES](#)

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory:

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Oct 19, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality:

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities:

[PFAS TSCA](#)

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest :

[PFAS E-MANIFEST](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Apr 9, 2023

PFAS Industry Sectors:

[PFAS IND](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Apr 16, 2023

Hazardous Materials Information Reporting System:

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

[NCDL](#)

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Feb 8, 2023

Toxic Substances Control Act:

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing:

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRCD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

ICIS

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.

Government Publication Date: Oct 15, 2022

Drycleaner Facilities:

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Dec 11, 2022

Delisted Drycleaner Facilities:

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Dec 11, 2022

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

FUDS Munitions Response Sites:

FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites:

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System:

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites:

LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations:

ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Mar 23, 2023

Superfunds Consent Decrees:

CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System:

AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers:

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

Spills:

SPILLS

A list of hazardous material spills and releases (including Meth Labs) that were reported to the Colorado Department of Public Health and Environment (CDPHE).

Government Publication Date: Apr 8, 2022

Colorado Oil and Gas Conservation Commission Spills:

[OG SPILLS](#)

A list of spills made available by the Colorado Oil and Gas Conservation Commission (COGCC).

Government Publication Date: Jun 7, 2023

Dry Cleaning Facilities:

[DRYCLEANERS](#)

A list of dry cleaners provided by the Colorado Department of Public Health and Environment (CDPHE) Hazardous Waste Compliance Assurance Unit and Stationary Sources Program.

Government Publication Date: Mar 14, 2023

Delisted Dry Cleaning Facilities:

[DELISTED DRYCLEANERS](#)

List of sites removed from the drycleaners database made available by the Department of Public Health & Environment.

Government Publication Date: Mar 14, 2023

Air Pollution Control Division Permitted Facilities:

[AIR PERMITS](#)

This list of Air Pollution Control Division Permitted Facilities is maintained by the Colorado Department of Public Health and Environment. The Stationary Sources Program evaluates and develops air permits for stationary sources in Colorado. The program inspects sources to determine compliance with air regulations and permit conditions and maintains an inventory of air pollution emissions throughout the state.

Government Publication Date: Feb 13, 2023

Per- and Polyfluoroalkyl Substances (PFAS):

[PFAS](#)

A list of facilities that reported storing or using AFFF or Class B firefighting foam, other PFAS chemicals, have reported PFAS passthrough, or have detectable limits of PFAS in their discharge.

Government Publication Date: Dec 8, 2020

Asbestos Abatement and Demolition Projects:

[ASBESTOS](#)

A list of Asbestos Abatement and Demolition Projects made available by the Colorado Department of Public Health and Environment (CDPHE), Air Pollution Control Division.

Government Publication Date: Dec 28, 2017

Hazardous Waste Sites- Generator:

[HAZ GEN](#)

A list of hazardous waste generators. This list is made available by the Colorado Department of Public Health and Environment (CDPHE).

Government Publication Date: Jun 30, 2003

Permitted Facilities Listing:

[PDES](#)

A list of permitted facilities tracked by the Water Quality Control Division of the Department of Public Health & Environment (DPHE). This list is the state version of the NPDES (National Pollution Discharge Elimination System).

Government Publication Date: May 1, 2023

Hazardous Waste Sites- Treatment, Storage & Disposal:

[HAZ TSD](#)

A list of facilities that treat, store, dispose, or recycle hazardous waste on-site. This list is made available by the Colorado Department of Public Health and Environment (CDPHE).

Government Publication Date: Jun 30, 2003

Hazardous Waste Sites- Corrective Action:

[HAZ CORRACT](#)

A list of hazardous waste generators with corrective actions. This list is made available by the Colorado Department of Public Health and Environment (CDPHE).

Government Publication Date: Jun 30, 2003

Uranium Mill Tailings Sites:

[UMTRA](#)

This list of former uranium mill sites in Colorado, with cleanup authorized by the Uranium Mill Tailings Remedial Action (UMTRA) program, was provided by the Colorado Department of Public Health and Environment. Because much of the cleanup is complete, the focus has shifted to primarily "Post-UMTRA issues," or the discovery of new uranium mill tailings material by private citizens, utility companies or local governments.

Government Publication Date: Sep 26, 2022

Tribal

No Tribal additional environmental record sources available for this State.

County

Historical Fill Areas:

[HIST FILL DENVER](#)

This dataset denotes the approximate locations of historical fill areas within the City and County of Denver (CCoD) and with within approximately three-quarters of a mile of the CCoD boundaries. The data was developed in 1997 by Pinyon Environmental Engineering Resources, Inc. (Pinyon) who at the request of CCoD completed an Historical Fill Area Evaluation using documents and research involving several regional and national sources. Locations of historical fill areas are approximations and should not be used for detailed planning or engineering purposes. This data is made available by the City and County of Denver, Technology Services / Enterprise Data Management.

Government Publication Date: Dec 17, 2019

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
