I say Yes

Not my cup of tea. However, these activities are highly regulated at the state level (CDPHE/DORA) and should be treated like any other legitimate business per a city regulatory perspective.

I say Yes

Personally I do not like tattoos but they are available else where so why not in Littleton. With restrictions such as their look, (store front image) and limiting to how many per block. They should be allowed the same as any other small business in town.

I say Yes

The free market should determine where these businesses are located. I have great disdain for tattoo parlors, but they should have the same rights as any other business. The free market should win this one, just as it should have won on recreational marijuana parlors - so I fully expect that the Council won't approve this sort of change either.

I say Yes

While I am not a big fan of tattoos, they are just another business that should be treated as any other. Let's not regulate for the sake of it.

I say Yes

I think that tattoos and body art have become more main stream with young people gravitating toward them. Of course, they would need to maintain the proper storefronts and be monitored well, but they should be allowed.

## Quick Poll: Regulation of tattoo and body art studio locations

Quick Poll: Should tattoo and body art studios be allowed to operate in the downtown or other retail centers around the city?

I am Neutral

Generally tattoo parlors don't have nice-looking store-fronts but if a shop was willing to adhere to certain rules on keeping their storefront nice and in similar condition to other shops in the area, such as retail shops, then I don't see why not. Body art is more socially acceptable now than it ever was and it might be nice for there to be a classy option available to consider.

I say Yes

I think as long as the business has a nice store front, then who cares that it is a tattoo shop?

While my personal feelings about tattoos are very negative, I simply don't understand why we are picking on this business. It makes a person wonder given all of the sad looking businesses in the city that are too cheap to even put up a good sign or cut their weeds. So much junk-looking stuff especially along Littleton Boulevard and Broadway.

I say Yes

This is private business that many young and some older people use. Locations should not be restricted just because some people do not like them. This argument could be said for any business or activity.

October 31, 2014, 12:56 PM

I say Yes

Absolutely! Tattoo shops have much to offer in that they will bring color, money, and cultural diversity to an area. Regulations are in place to ensure professionalism.
