U.S. ENVIRONMENTAL PROTECTION AGENCY
PUBLIC NOTICE

PURPOSE OF PUBLIC NOTICE
The purpose of this notice is to advise all interested parties of the Littleton-Englewood's National Pollutant Discharge Elimination System (NPDES) permit Number CO-0032999 request to modify its Industrial Pretreatment Program. The request for program approval includes:

Modification
Revision of the Municipal Ordinances for the Cities of Littleton (Title 7, Chapter 5) and Englewood (Title 12, Chapter 2, Sections 1 through 5) to incorporate EPA required changes pursuant to the General Pretreatment Regulations found in 40 CFR, Part 403.

This program approval affects the industrial users that discharge to the Littleton-Englewood POTW. An industrial user is any user that discharges non-domestic wastewater to the POTW.

The EPA has determined this approval to be "substantial" for purposes of the General Pretreatment Regulations at 40 CFR Section 403.18. Therefore, The EPA is providing this notice to afford interested persons the opportunity to provide comments on the Pretreatment program modification submitted by the Littleton-Englewood and the EPA's intent to approve the modification.

This shall be the only public notice if the EPA determines that no substantive comments are received and the modification to the Pretreatment program will be approved as submitted, provided the documents submitted to the EPA are adopted, ratified, and otherwise made final and effective by the Littleton-Englewood. Upon approval, this Pretreatment program modification shall be incorporated into the NPDES permit and is a minor modification of the NPDES permit as specified in 40 CFR Section 122.63(g). The EPA intends to approve all changes that reflect direct Federal authority as shown at 40 CFR Part 403.

SUMMARY INFORMATION
The federal Clean Water Act established the NPDES permit program to regulate the discharge of pollutants by persons to waters of the United States. In addition, the Act established toxic pollutant and pretreatment standards and requirements for industrial users (sources of non-domestic indirect discharge) of POTWs. The implementing regulations may be found at 40 CFR Part 403. POTWs with either a design flow greater than five million gallons per day, significant industrial user inputs, or otherwise designated by the NPDES program director, must actively regulate their industrial users and assure compliance by these users with all applicable federal and local Pretreatment Standards and requirements. The requirement for a POTW to properly implement its program is an enforceable provision of its NPDES permit.

FURTHER INFORMATION AND COMMENTS
Persons wishing to review the program modification submitted by the Littleton-Englewood, may contact in writing:

Al Garcia, Pretreatment Coordinator
U.S. EPA Region 8, Wastewater Unit
Mail Code: 8P-WWW
1595 Wynkoop Street
Denver, Colorado 80202-1129

Interested parties may also mail Al Garcia at (303) 312-6382 or garcia.al@epa.gov. These documents are available for inspection at the address above.

Comments regarding this modification must be postmarked no later than 30 days from the date of this public notice.
